TOP: 6 + 4 oz.

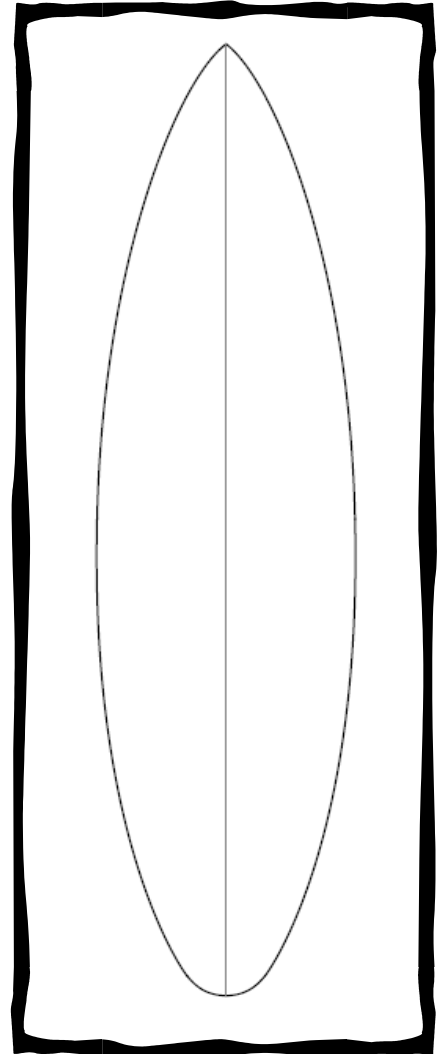

BOTTOM: Single 4 oz.

( custom glass available on custom orders)

FIN BOXES: TRI Future Systems Boxes

FINS: AM1 450 Future Systems

FINISH: Sanded or Gloss & Polish

DESCRIPTION: The EV-2 is a modern high performance tri fin shortboard, built with a bit more length and width. This board is a great paddler and wave catcher. Shallow single to double barrel concave underfoot and slight tail 'V' give the board plenty of turning acceleration, smooth rail to rail transitions, and good down the line speed. The EV-2 is well suited for the surfer who wants shortboard performance that is stable, balanced and has a bit more float. Heavier or old school surfers will especially love this board.

**All Hammersurf surfboards are made with only the highest quality resin, fiberglass, and foam available. All boards are handmade in the Pacific Northwest USA by Cascade Performance Fiberglass, building fine surfboards since 1972. WWW.HAMMERSURF.COM (541 478-3441)**
