DESCRIPTION: The SE Speed Egg is a high performance hybrid fun shape. It's over all plan shape is similar to our popular HE Hammer Egg design except for a narrower nose outline. This gives the board greater performance while retaining lots of paddling and wave catching power. The narrower nose has better release and less 'hang up' than the wider nosed HE especially in larger surf or on a steeper wave face. The SE is a good choice when greater performance and good paddling are needed.

All Hammersurf surfboards are made with only the highest quality resin, fiberglass, and foam available. All boards are handmade in the Pacific Northwest USA by Cascade Performance Fiberglass, building fine surfboards since 1972. WWW.HAMMERSURF.COM (541 478-3441)
